

# T366

# Decoder Digitale Terrestre HD

The **iZAP T366** is a simple, reliable digital terrestrial decoder, which gives access to free television programming even in High Definition. Simple and intuitive menus give access to Automatic Channel Ordering, Child Lock and Automatic and Manual Channel Scanning.

With Media Player capabilities for playback from an external USB device, you can use the T366 as a media player (video, audio and image files).

The universal remote control allows you to manage both the television and the decoder with a single remote control.

The decoder is upgradable via USB so you always have the latest software.
