2. The device shall be used within its published power rating on the instructions.
3. Please contact seller for replacement if there is any damage caused by transportation.
4. Please plug in the socket in proper condition and away from children.
5. Please plug in the socket fully while using for safety concern.
6. Do not plug in this device one after the other.
7. Do not cover the device when operating.
8. No voltage only when the plug is disconnected.

## ■ Installation Guide

1. Download the Meross app.

2. Plug the device into an outlet near main Wi-Fi.\*

- \* Proximity to main Wi-Fi is required only during the initial setup process.
- \* MSP843P only supports 2.4GHz networks.

### **3. Set up the device.**

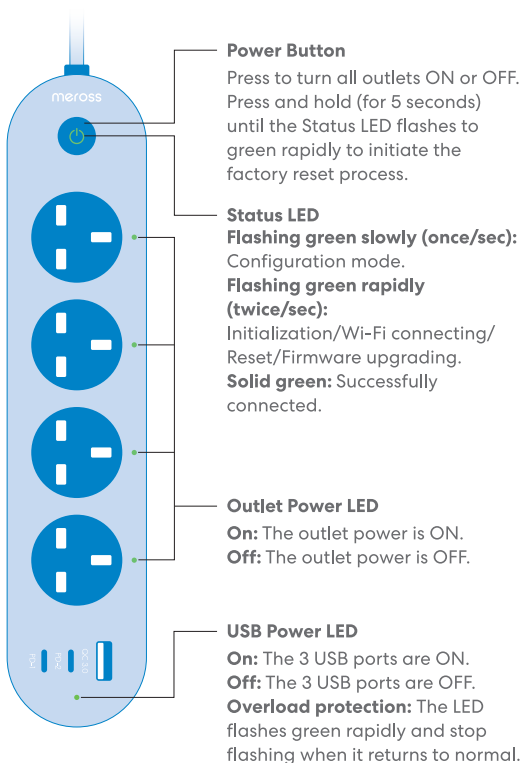

- (1) Connect your smartphone or tablet to a 2.4 GHz Wi-Fi network.
- (2) Make sure your smart device is covered by strong Wi-Fi signal.
- (3) Launch the Meross app and log in to your account, or if you are a new user, tap Sign up to create a new account.
- (4) Tap the “+” icon to select the type of smart device you want to add, then you can just follow the setup wizard to finish configuration.
- (5) Relocation of the smart device does not require additional operations provided that it remains on the same network with strong Wi-Fi signal.

- \* MSP843P only supports 2.4GHz Wi-Fi network.

Note:

1. If this is not the first time you've added this smart device, you'll have to reset it before going any further.
2. As long as you finish configuration, you'll be able to manage the device in Apple Home app.
3. If the QR code does not work, please try to add the smart device in Apple Home app.

## ■ FAQ

At Meross, we strive to assure your satisfaction. Attached below is a non-exhaustive list of questions that users are mostly concerned about.

### **1. What devices can I control with the Smart Fast Charging Power Strip?**

You can control lights, humidifiers, portable heaters, fans, and any small appliances in accordance with the product specifications. You can also control the charging time of your laptop and cell phone.

### **2. I can't pair my device with HomeKit anyhow.**

Please ensure your iOS is connected to the 2.4GHz home Wi-Fi and you have iOS 13 or above. Restarting your iOS will help due to some system cache issues.

### **3. In the process of charging a device and plugging in another device, the device already charging will be disconnected from charging 1-2 times and then resume charging again is this normal?**

This is normal. In the case of using multiple ports at the same time, inserting a new device or unplugging a device, the charging module will re-identify the protocol and redistribute power to the device, so please feel free to use it.

### **4. The USB LED keeps flashing and there is no output to charge the device what is going on?**

USB LED light has been flashing fast is overload tips, stop output is to protect the safety of the device, disconnect all charging devices and wait for the LED to stop flashing, USB charging will return to normal.
